### Outcomes

A student:

SC5-14LW - analyses interactions between components and processes within biological systems

SC5-7WS – processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions

SC5-9WS – presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations

### Task description

Students are to access information from the NSW Health website for disease which is provided with the task.

Using this information, students are to create a fact sheet poster on one named disease to present this information in an effective manner. Students are also required to create a 60 second video about a different named disease.

Canva can be used to create the poster and the video but it is not a requirement for the task. Class time will be allocated to work on and complete the task. If the task is not completed in class, it will need to be finished off at home.
